MODELING BLENDED CEMENT HYDRATION

Condition: New. Publisher/Verlag: LAP Lambert Academic Publishing | A hydration-based integrated system for blended cement to predict the early-age properties and durability of concrete | Fly ash, silica fume, and granulated slag, are among the industrial by-products that are widely used in Portland cement concrete. A numerical model is proposed to simulate the hydration of concrete containing silica fume, fly ash and slag. The model of the effect of applied hydrostatic pressure on cement hydration is also proposed. Based on...

Reviews

Complete guide! Its such a great study. I am quite late in start reading this one, but better then never. It is extremely difficult to leave it before concluding, once you begin to read the book.
