

Mathematical Methods for Surface and Subsurface Hydro systems

By -

Higher Education Press, 2010. Soft cover. Condition: New. With the increasing awareness of the heavy burden placed on environmental resources and the need of industry and public institutions to cope with more stringent regulations, this timely book focuses on some specific, but very important, environmental problems, namely, surface and subsurface hydrosystems. It covers state-of-the-art techniques to model such systems. This book will be of great benefit to all researchers in applied mathematics and environmental engineering. preface series talks p. ackerer, a. younes: a finite volume formulation of the mixed finite element method for triangular elements alexandre ern: finite element modeling of hydrosystems with fully saturated, variably saturated, and overland flows patrick goblet: sharp front modeling catherine gourlay, marie-hldne, tusseau-vuillemin: numerical modeling of biological processes: specificities, difficulties and challenges deguan wang: ecological simulation of red tides in shallow sea area ling li: subsurface pathways of contaminants to coastal waters: effects of oceanic oscillations invited talks tingfang wang, sixun huang, huadong du, gui zhang: studies on retrieval of the initial values and diffusion coefficient of water pollutant advection and diffusion process jing chen, zhifang zhou: application of tabu search method to the parameters of groundwater simulation models xiaomin xu, deguan wang: several problems in...

Reviews

Completely essential go through book. I actually have go through and i am sure that i am going to going to read yet again yet again later on. It is extremely difficult to leave it before concluding, once you begin to read the book.

-- **Edwardo Rohan III**

I actually started out looking at this publication. it was actually writtern really perfectly and useful. Its been written in an extremely simple way and it is only soon after i finished reading through this pdf by which really modified me, change the way i really believe.
