

Technical Drug Studies (Classic Reprint) (Paperback)

By United States Department of Agriculture

Forgotten Books, 2018. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****.Excerpt from Technical Drug Studies Hydrogen peroxid was discovered by P. Thenard in 1818 by the action of dilute acids on barium peroxid in the presence of water. It occurs in minute quantities in the atmosphere and is formed by the oxidation of many substances in the presence of water, for example, phosphorus, zinc, cadmium, tin, bismuth, copper, turpentine, and certain essential Oils. It is also generated in appreciable quantities in the metabolic processes of chlorophyll-bearing plants. Hydrogen peroxid was considered a chemical curiosity for many years after its discovery, but was finally introduced as a medicinal agent by B. W. Richardson in 1856. It was believed for a long time by some to be a specific in the treatment of diphtheria, but this is now known to be a fallacy. Hydrogen dioxid is, however, known to be a most valuable germicide and antiseptic and is probably used more generally by the public and the several professions handling medicinal agents than any other single germicide. Numerous investigations have been made to devise methods that would yield a suitable product without the use Of preservatives,...
